**DETAILED ACTION**

**Claims 18-26 are pending in the application.**

***Election/Restrictions***

Applicant's election without traverse of Group I (claims 18-26 - drawn to a process for preparing fluoromethyl-substituted heterocycles of formula I wherein A is a pyrazole ring which is substituted by R<sup>4</sup>) in the reply filed on November 19, 2007 is acknowledged. Applicant has cancelled claims directed to the non-elected inventions and non-elected subject matter per the Amendment filed November 19, 2007.

The requirement is still deemed proper and is therefore made FINAL.

***Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Information Disclosure Statement***

The Examiner has considered the Information Disclosure Statement filed on April 21, 2006.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 25 and 26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to

particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 25 and 26, the phrase "that it is carried" should be changed to "that is carried".

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 18-20, 22, 25 and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by Hayashi et al. {U.S. Pat. 6,417,361}.

Hayashi et al. disclose the process of Example 23 (column 22, lines 58-67), which is embraced by the instant claimed invention. Therefore, Hayashi et al. anticipate the instant claimed invention.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 18-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hayashi et al. {U.S. Pat. 6,417,361}.

***Determination of the scope and content of the prior art (MPEP §2141.01)***

Applicant claims a process for preparing fluoromethyl-substituted pyrazole compounds. Hayashi et al. (see entire document; particularly columns 1 and 2, formulas 23 and 24 in column 6 and columns 15 and 16; and especially Example 23 in column 22, lines 58-67) teach a process of preparing fluorination agents that is either the same as (see above 102 rejection) or similar to the instant claimed process.

***Ascertainment of the difference between the prior art and the claims***  
***(MPEP §2141.02)***

The difference between some of the reactants of the prior art and the reactants of instantly claimed process is the use of analogous reactants.

***Finding of prima facie obviousness--rational and motivation (MPEP***  
***§2142-2413)***

The use of analogous reactants in a known process is *prima facie* obvious. In re Durden, 226 USPQ 359 (1985). Once the general reaction has been shown to be old, the burden is on Applicants to present reasons or

authority for believing that a group on the starting material would take part in or affect the basic reaction and thus alter the nature of the product or the operability of the process. In looking at the instant claimed process as a whole, as stated in In re Ochiai, 37 USPQ 2d 1127 (1995), the claimed process would have been suggested to one skilled in the art.

One skilled in the art would thus be motivated to utilize the process of the prior to arrive at the instant claimed process with the expectation of producing fluorination agents. The instant claimed invention would have been suggested to one skilled in the art and therefore, the instant claimed invention would have been obvious to one skilled in the art.
